

Introducing Q-Labs - Sports Performance

Thank you for showing an interest to become a partner in our new UK and Ireland network of externally accessible Qualisys powered labs. The purpose of this new network is to showcase our customer expertise, enhance commercialization opportunities for you by increasing visibility, and to improve access for sports people wishing to access world leading biomechanics support. Joining this network is free and comes with various benefits:

- Dedicated webpage highlighting each partner lab, its services and direct links to your booking page (where applicable) and contact details for enquiries;
- Enhanced visibility of your commercial and consultancy services to promote commercial/consultancy activity, through regular showcasing of facilities and expertise on our various media streams;
- Annual quality check of data to ensure our systems and tools are optimised for your purposes;
- Opportunities to network with other Q-Labs around the UK, to share good practice and upskill.
- An annual forum (either in-person or remote) to share innovative approaches to income generation, good practice in running a commercial/consultancy service, and to inform future developments.
- A launch event summer 2026.

What would a partner in the Q-Lab network offer?

There are no specific requirements for the services any Q-Lab partner provides, beyond the requirement to be employing Qualisys motion capture technology (cameras/software) to deliver a service to a member of the public. You may also wish to highlight opportunities for bespoke and large team/organisation assessments.

It is our hope that partners will take advantage of the end-to-end Calculus and Report Center features to enable standardization, and enhance efficiency and therefore profitability in their services, however this is not a pre-requisite (visit: <https://www.qualisys.com/analysis/online-reporting/>).

The Q-Lab network will have a dedicated webpage, which will host a navigable map to show the closest facility, a summary of each partner's offering, a small image of the lab or institution logo, and contact/booking details (e.g. link to web-booking page).

To join the Q-Lab network as a partner, please complete the attached form and return to martin.lewis@qualisys.com along with an image of the facility or institution/company logo. Images may be sent at a later time.

We look forward to your reply, and hope you choose to partner with Q-Labs.

Martin Lewis
Sales Manager, UK and Ireland

Q-Labs Partner Sign Up Form:

General Information (all information will be shown on the Q-Labs webpage)	
Lab Name / Institution / Research Group (as applicable)	
Address and Post code for lab	
Primary contact for enquiries (email/telephone)	<i>If client should only visit the institution website, please leave this box blank:</i>
Website for further information / booking page
